  - Strengthened communication skills through regular interactions with others.
- 

## CERTIFICATES

- Python for Data Science (NPTEL)
  - Mobile Application Development in REACT-NATIVE.
- 

## PROJECT

### Abnormality Detection System for Network Traffic

- Network anomaly detection is a process that identifies unusual patterns in network traffic that deviate from normal behavior, potentially indicating issues like cyberattacks or misconfigurations.
- This involves collecting network data establishing a baseline of normal traffic based on historical data, and then flagging deviations as anomalies.

### Effortless Entry and Exit with QR Code Powered Parking

- QR-code based system enables secure, real-time reservation and vehicle verification.
- Improves efficiency by reducing congestion, manual errors, and enhancing user convenience.
